

MARSHALL JUNG

Senior Executive: AI Strategy | Global Operations | Enterprise Transformation Littleton, CO |
(720) 315-6713 | jung.marshall@gmail.com | [linkedin.com/in/marshall-jung-43760258](https://www.linkedin.com/in/marshall-jung-43760258)

Executive Manifesto: Code and Steel

I bridge the gap between Silicon Valley innovation and the realities of a Fortune 1000 P&L. As a former Google ML Strategic Advisor and current Head of AI for a major industrial brand, I specialize in moving artificial intelligence from "demo cool" to "enterprise critical." My leadership philosophy is built on "Code & Steel"—combining the precision of hard engineering with the foresight of modern AI strategy. I don't just hire engineers; I hire "rocket navigators" who can steer complex organizations through technological disruption.

Strategic Foresight & Industry Publications

Author, "Marshall's Monday Morning ML" (2023–Present): A widely-read weekly intelligence briefing analyzing the intersection of AI, macroeconomics, and enterprise strategy.

<https://medium.com/@jung.marshall>

- The 3-Layer Pyramid¹: Developed a strategic blueprint for enterprise survival that prioritizes data hygiene and SaaS optimization before deploying agentic layers, arguing against the premature adoption of "magic" AI solutions without foundational structure.
 - The "Human Firmware" Update²: Pioneered a change-management methodology focused on upskilling workforces to overcome the "carbon bottleneck" in AI adoption, identifying that enterprise constraints are often human, not silicon.
 - Operationalizing Uncertainty³: Established frameworks for managing the non-deterministic nature of LLMs in compliance-heavy industries, treating AI as a "probabilistic oracle" rather than a deterministic calculator.
-

Professional Experience

Valvoline Global Operations | Senior Director - Global Head of Artificial Intelligence | Nov 2025 – Present

Recruited to lead the AI transformation for a global CPG/automotive leader, moving the organization from sporadic experimentation to operationalized intelligence.

- Strategy: Developing the "Sandbox to Assembly Line" roadmap, shifting focus from theoretical AI capabilities to tangible operational ROI in supply chain and manufacturing.
- Execution: Overseeing the deployment of "Moonshot" fine-tuned expert models (e.g., Synthetic Chemist) to accelerate R&D cycles and improve product formulation efficiency.
- Infrastructure: Partnering with NVIDIA to pilot cutting-edge dielectric fluid immersion cooling for on-premise GPU clusters, driving sustainability and compute efficiency.

Shrike Ventures | Founder & Principal AI Advisor Jan 2022 – Present | Fractional CTO Advisor for Venture Capital and DeepTech startups.

- Due Diligence: Advisor to Denver Ventures and other funds, providing technical due diligence on AI/ML investment targets.
- Strategic Architecture: Served as Lead AI Architect for Istari Digital, designing a universal API layer to integrate competing digital engineering tools (AutoCAD, Ansys), breaking vendor lock-in.

Tabnine | Lead Solutions Architect & Customer Success (Enterprise) | Mar 2022 – May 2023

- Enterprise Deployment: Architected secure, on-premise LLM solutions for Fortune 100 clients, enabling AI code generation while meeting strict zero-trust security mandates.
- Adoption at Scale: Deployed fine-tuned models for a 3,000-developer organization, resulting in a measurable 12% increase in coding efficiency.

Google | Strategic Cloud Advisor & ML Specialist | 2017 – 2021

- Public Sector Innovation: Led the technical development for Project Maven (USAF), engineering UAV/satellite image segmentation algorithms that became the foundation for Google's commercial Vision AI.
- Cloud Strategy: Architected a zero-trust evaluation methodology for the DOJ, helping secure FedRAMP High attestation for Google Cloud Platform.

Whiting Petroleum & Halliburton | Senior Data Scientist & Petrophysicist | 2006 – 2017

- The "Steel" Foundation: Spent over a decade in "hard engineering" roles, managing multi-national teams and developing proprietary analytics tools that saved \$1.5M per well by optimizing completion cycles.

Education & Certifications

Colorado School of Mines

- Bachelor of Science, Engineering (Economics Specialty)
- Bachelor of Science, Mathematics & Computer Science

Certifications: Google Cloud Professional Data Engineer

Technical

- Strategic AI: LLM Orchestration, RAG Architecture, Agentic Workflows (DSPy), Model Context Protocols (MCP).
- Enterprise Leadership: Zero-Trust Security, Change Management, Technical Hiring ("The Rocket Navigator" methodology).
- Technical Roots: Python, TensorFlow, OpenFoam (CFD), Statistical Modeling.
